Tough Fabric - Tough Tank
Suitable for Petrol - Gasoline - Diesel.
See large range Super Deck Tanks for diesel.

Brass Outlet Valve/hose tail Ø 9.5mm 3/8"
Fits outboard motors intake

Filler lift up handle

Brass Inlet/Cap Ø 25mm 1"

OVER ENGINEERED? THAT'S HOW WE GET THINGS DONE

STANDARD TANK MODELS

40 LT 10.5 GAL

Specifically to fit Thundercat Stern and fits most smaller boats

105 LT 27.7 GAL

Empty Weight 5.5 kg 12.2 lbs

990mm 39"

Empty Weight 3.2 kg 7 lbs

200 LT 53 GAL
Suits Bertram 25, Boston Whaler 26 etc

1020mm 40"

1020mm 40"

1100mm 43"

80 LT 21 GAL

Suits virtually any RIB-Fish-Dive boat

Height Full 220mm 8.5"
Empty Weight 4.2 kg 9.3 lbs

1500mm 59"

Height Full 230mm 9" Empty Weight 8 kg 17.7 lbs

EASY TO FILL

200 Lt 53 Gal filled up. Webbing straps secure tank. Anti-Surge harness firms tank - no surge. Hose/Relief Valve secured for overboard vent.

Choose to feed engine direct OR top up main tank.

Gravity or siphon fill main tanks. Clean easy process.

NO JERRY CANS

Hard to secure Hard to pour Hard to stow

SAVE YOUR ENERGY FOR FISHING...

Folded up tank frees up cockpit for fishing or diving. No more jerry cans to store.

STABLE SHAPE - EASY TO SECURE

MAIN FUEL TANK OR ONLY LONG RANGE TANK?

TURTLE-PAC tanks are often used as the main fuel tank as there are numerous advantages over rigid tanks.

FUEL QUALITY GUARANTEED:

- No airspace means no condensation
- no fuel contamination.
- Fuel bugs less likely to form compared to inside of rigid tanks.

SAFETY: • No air in tank means no airlocks possible even if the tank is almost empty, a priceless safety feature in rough water when a stalling engine can mean a capsizing. • In case of fire there are no vapours contained in the tank to cause an explosion.

LIFE EXPECTANCY: • Ten years plus. Flexible construction means there is no rigid weld to crack as fuel is sloshing about partially empty rigid tank. Turtle-Pac will exceed the pressure resistance of aluminium tanks typically by 300%. Turtle-Pac tanks are constructed by electronically fused seams. The seam's strength equals the fabric strength, and it is maintenance free. No glue or chemical bonding is used as those technique are prone to leaks.
